

Figure 1 is a scatter plot showing the relationship between the number of files (X-axis) and the number of files (Y-axis). The X-axis ranges from 0 to 140, and the Y-axis ranges from 0 to 140. A solid blue line represents the identity function (y=x), and two dashed blue lines represent the confidence interval. Data points are categorized by risk level: low (plus sign), medium (diamond), and high (square). The high-risk point is at approximately (68, 68). The medium-risk points are clustered around (90, 90). The low-risk points are clustered around (110, 110).
