

Figure 10 is a line graph showing the number of cycles found (Y-axis, 0 to 2500) versus the number of iterations (X-axis, 0 to 2500). The graph compares eight different configurations for finding cycles in a C++ multithreaded environment. The configurations are:

- 1197-Cycle_Finding-c++-mult-0W-iotlab1-20-02-2026-16-23 (Blue line with '+' markers)
- 1197-Cycle_Finding-c++-mult-10W-iotlab1-21-02-2026-17-11 (Red line with square markers)
- 1197-Cycle_Finding-c++-mult-15W-iotlab1-21-02-2026-08-55 (Green line with '+' markers)
- 1197-Cycle_Finding-c++-mult-1W-iotlab1-09-03-2026-08-44 (Purple line with diamond markers)
- 1197-Cycle_Finding-c++-mult-25W-iotlab1-21-02-2026-00-38 (Black line with circle markers)
- 1197-Cycle_Finding-c++-mult-2W-iotlab1-22-02-2026-01-32 (Cyan line with star markers)
- 1197-Cycle_Finding-c++-mult-4W-iotlab1-10-03-2026-07-44 (Yellow line with triangle markers)
- 1197-Cycle_Finding-c++-mult-8W-iotlab1-10-03-2026-18-06 (Orange line with circle markers)

The 25W configuration shows the highest number of cycles found, reaching approximately 2500 cycles at around 500 iterations. The 2W configuration shows the lowest number of cycles found, reaching approximately 1700 cycles at around 1700 iterations.
